Varun Sharma

Bengaluru, India +91 88005 24734 varunsh1701@gmail.com LinkedIn GitHub

Summary

Senior Software Engineer specializing in distributed systems, cloud infrastructure, reliability, and AI-driven automation. Led and built globally distributed systems serving ∼**3M QPS**, multi-provider traffic infrastructure, and production agentic AI systems for infrastructure investigation.

Experience

LinkedIn Oct 2025 – Present
Senior Software Engineer, Reliability *Bengaluru, India*

- Set technical direction, requirements, and roadmap for Edge reliability and automation initiatives, driving high-impact projects from architecture through production.
- Led the design and development of **Edge Brain**, a global intelligent DNS traffic-steering platform managing ∼**3M QPS** across **7 traffic providers** and **2 DNS providers**; personally built the central control plane and data plane.
- Built provider health-scoring and multi-metric optimization systems using availability, latency, performance, cost, and traffic signals to generate optimal provider assignments and execute country-level or global traffic shifts through DNS; reduced CDN outage detection and mitigation from **7 minutes to 2 minutes**.
- Designed autonomous failover and safety mechanisms for Edge Brain, helping reduce serving costs and overage charges by **millions of dollars annually** while minimizing engineer intervention.
- Expanded the production agentic AI investigation platform into a general-purpose service for **ad hoc Edge investigations**, integrating it with Claude and GitHub Copilot as an on-demand investigation skill and building MCP tools to connect agents with production RUM and synthetic performance telemetry.
- Led development of an in-house RUM pipeline covering **all LinkedIn user sessions**, providing end-user performance signals for intelligent traffic steering and AI-driven infrastructure investigations.

LinkedIn Oct 2023 – Sep 2025
Senior Engineer, Site Reliability *Bengaluru, India*

- Led the multi-year migration of LinkedIn's edge delivery to a **multi-provider architecture with Cloudflare**, leading the project team and driving alignment across product, security, traffic, and performance organizations; owned performance validation, real-traffic A/B testing, Cloudflare configuration, production rollout, and RUM instrumentation, improving **DDoS protection**, resilience, and performance while delivering **multi-million-dollar annual savings**.
- Built and productionized a **agentic AI platform** for Edge infrastructure RCA using LangChain and Temporal, automating SLO-breach investigation and incident enrichment and reducing engineer investigation time from **30 minutes to 3 minutes (90%)**; deployed it across the Edge team and established the foundation for the generalized investigation platform used today.

LinkedIn Jul 2021 – Sep 2023
Site Reliability Engineer *Bengaluru, India*

- Built an AI-driven DNS orchestration system for automated Edge failover and optimal traffic routing across Azure Front Door and CDN infrastructure.
- Drove migration of LinkedIn traffic from legacy Edge infrastructure to **Azure Front Door**, including production configuration and DNS ramp-up; partnered with Microsoft Azure engineering teams to identify and resolve AFD issues.
- Improved `lnkd.in` performance by eliminating an unnecessary redirect and enabling Azure Front Door edge caching.

LinkedIn May 2020 – Jul 2020
Site Reliability Engineering Intern *Remote*

- Developed an AI-based diagnostic pipeline for identifying site-performance issues and capacity bottlenecks across LinkedIn's service-oriented infrastructure.

Skills

Languages: Python, Go, C++, Java, SQL **AI:** Generative AI, Agentic AI, MCP, LangChain, Machine Learning
Infrastructure: Distributed Systems, SRE, CDN, DNS, Edge Computing, Microsoft Azure, Azure Front Door, Cloudflare
Systems: Linux, Docker, Temporal, FastAPI, Flask, RabbitMQ

Education

Netaji Subhas Institute of Technology, University of Delhi Aug 2017 – Jun 2021
B.E. in Computer Engineering, CGPA: 8.65/10 *New Delhi, India*
